OBJECTIVE

Third-year Mechanical Engineering student from IOE Purwanchal Campus looking for a 1-month OJT(Internship) placement at Nepal Airlines. Eager to see how classroom principles of fluid dynamics, thermodynamics, and machine design translate to heavy aircraft maintenance and hangar operations, with availability to coordinate a 1-month training window around upcoming maintenance schedules.

EDUCATION

- **Bachelor of Mechanical Engineering (BME)**
 - *Institute of Engineering (IOE), Purwanchal Campus, Tribhuvan University*
 - **Status:** 7th semester (Current)
- **Higher Secondary Education (+2 Science)**
 - *Koshi Saint James College, Itahari-9, Sunsari* | **Year:** 2079 (2022)
- **Secondary Education (SEE)**
 - *Samata School Mechi, Damak-9, Jhapa* | **Year:** 2076 (2020)

TECHNICAL SKILLS & COMPETENCIES

- **CAD & Modeling:** SolidWorks (3D component modeling and assembly design), AutoCAD.
- **Core Engineering Knowledge:** Fluid Mechanics, Thermodynamics & IC Engines, Machine Design, Workshop Technology.
- **Practical Skills:** Hands-on experience with precision measuring instruments (vernier calipers, micrometers), tool handling, and technical checklist execution.

PRACTICAL EXPERIENCES & PROJECTS

- **Mechanical Design Portfolio (Independent Study):**
 - Utilized SolidWorks to design and model complex mechanical components, focusing on structural tolerances, assembly fits, and material properties.
- **Campus Workshop Practices (IOE Purwanchal):**

- Completed practical modules in welding, lathe machine operations, sheet metal fabrication, and fitting shop practices.
- Maintained strict workshop safety protocols and tool accountability during team fabrication tasks.

TRAINING & INTERESTS

- Learning about how aircraft engines and mechanical systems work in real life.
- Understanding the daily maintenance checks and safety inspections done on airplanes.
- Studying technical manuals and blueprint designs for mechanical parts.
